Securities and General Trust plc

Investment Objective: To achieve capital growth through a focused portfolio of investments, particularly in companies whose share prices stand at a discount to estimated underlying net asset value.

## Performance Commentary

Over the month NAV was up 2.2%<sup>1</sup>. This compares to an increase in the benchmark of 1.7%<sup>2</sup> and a decrease of 0.7%<sup>1</sup> and an increase of 2.9%<sup>1</sup> for the MSCI World (£) and FTSE All Share indices respectively.

## Manager's Comment

It is almost 12 months since the markets began to rally last March and the bull market is showing some signs of fatigue. The technology and cyclical stocks which have led the market are finding it hard to make progress and there are signs of rotation into defensive sectors. The FTSE 100, which is heavily weighted in defensive stocks, has been showing signs of relative out performance. For our part, we have become more cautious on the short term prospects for mining stocks and have reduced our overweight position there.
